## WHY NOT TEACH

Teaching now offers:

1. An adequate wage. A Normal School graduate cannot receive less than \$100 a month, at the very beginning. What other business or profession now offers superior initial inducements?

2. An opportunity for personal and professional advancement. Teaching is not a blind alley profession. The teacher can keep on growing.

3. A large field of service. No profession surpasses teaching in the call for service—personal, community, national. The teacher discharges a Christian and patriotic duty in the training of youth in correct habits, ideals, and citizenship.

4. Vacation opportunities to study, travel, or rest. This should be an important factor in the selection of life's work.

5. A real joy by constant contact with childhood and youth. The influence of the teacher often survives for years in the lives of his pupils. "The love you liberate in your work is the only love you keep."

"Enrich your life with a knowledge of many things; ennoble it by teaching others."

Mr. William H. Hatfield, Tioga, Pa.; Mr. Scott Jenkins, Blossburg, Pa.; Dr. C. W. Sheldon, Wellsboro, Pa.; Mr. H. C. Carpenter, Troy, Pa.
- 

### HOW TO REACH MANSFIELD

Mansfield is thirty-six miles from Elmira, via the Erie railroad. Students coming via the Northern Central railroad, change at Elmira; those coming via the Pennsylvania Division of the New York Central change at Tioga or Lawrenceville. Passengers from the East, by the Erie, change at Elmira; by the Lehigh Valley, change at Waverly, thence to Elmira and Mansfield by Erie; by the D. L. & W., change at Elmira, thence to Mansfield by the Erie. Those coming from the West, on the Erie or D. L. & W., change cars at Elmira.

The new Pennsylvania state highway connecting the New York state highway with the large cities of the east passes through Mansfield. There is now a completed concrete road from the New York state line at Lawrenceville, south into Mansfield to Williamsport, Harrisburg, Philadelphia, and other cities. The east and west roads of the state also pass through Mansfield. Some of these have been completed and others are under construction. This junction of concrete roads places Mansfield advantageously on the principal highways for automobile service. There is a bus service from Towanda to Troy to Mansfield, and from Wellsboro to Mansfield, all the principal trains being met. Two auto buses daily leave Williamsport for Blossburg to connect with the bus service to Mansfield. These are operated over the new concrete road. Inquiry upon the part of students concerning these services will enable them to reach Mansfield in much less time than formerly. There is also excellent auto bus service now leaving Mansfield connecting with all the points named. These new highways are through the most beautiful country of the east.

All baggage should be distinctly marked with the name of the owner and "State Normal School" to insure its being brought to the normal building. Whenever baggage is to be taken to the station, it should be marked with the name and destination of the owner.

A special train is generally operated to accommodate our students on the opening day of the Fall Term.

A bulletin of information will be sent to all enrolled students about two weeks before the opening of school.

## THE FACULTY

**WILLIAM R. STRAUGHN, Ph. D., Principal.**

**Ethics.**

Training: Laurel (Del.) High School, four year course, 1899; Graduate Baltimore (Md.) City College, 1902; A. B., Johns Hopkins University, 1905; Graduate student same, 1905-1906; Ph. D., University of Kansas City, 1908.

## THE COURSE OF STUDY

After students have been in attendance in the Regular Normal Course a semester, they will elect the group, as Kindergarten-Primary, Intermediate Grades, Grammar and Junior High School, or Rural, as major, with broad opportunities for electives in college subjects. However, graduation from one group does not limit the teaching to that group, but the diploma is good for any grade of teaching from Kindergarten up to and including Junior High School. Graduates of the Regular Normal course, who add 12 semester hours in the proposed field of teaching, will be eligible to teach in Senior High Schools. This additional work, all of college grade, may be taken during the regular or summer sessions at the State Normal Schools. Graduates of the recognized special courses are eligible to teach in Grades or Junior and Senior High Schools, or to supervise their special subjects.

---

## REQUIREMENTS FOR ADMISSION

### A. Education:

1. Graduates of standard four year high schools, who can present evidence of having completed fifteen Carnegie units may be admitted. Graduates of a four year high school that has not been classified by the Department of Public Instruction as standard (but is classified as second class) will not be admitted. Such persons, however, "may take examination in fourth year subjects, and (if passing) receive credit equivalent to that of first grade high school." The Normal School has nothing whatever to do with this examination, which is conducted entirely by The Credentials Bureau, Department of Public Instruction, Harrisburg, Pa., to whom all inquiries should be addressed. The Credentials Bureau plans to hold examinations in all counties for such high school pupils at the close of the school year, and again in August. There are several of these second class (4 year) high schools in our district, and graduates of these or any unclassified four year high school must be assured of their standing before applying for admission to the Normal. No distribution of units by subjects is required for admission.

2. Graduates of senior high schools in a school system with junior high schools will be accepted with evidence of twelve Carnegie units.

---

## THE MANSFIELD NORMAL QUARTERLY

---

3. Advanced credit will be given for equivalent course in approved teacher training institutions, but no student may obtain a Normal School certificate without a minimum residence of one-half year (a full semester, not including summer session).

4. College students in good standing will be accepted, and their work evaluated on the basis of parallel courses offered at Mansfield.

### B. Character:

5. Students must be of good moral character, and their acceptance for admission is conditioned upon their accord with the school regulations governing conduct as befits prospective teachers.

### C. Health:

6. Students must be in good health; and not incapacitated by serious body or speech defect.

7. We advise all prospective students to be vaccinated for small-pox; and to have had serum treatments, as approved by the medical profession, for diphtheria and scarlet fever, unless having been rendered immune by having had the disease. These precautions may eventually save you much loss of time, both as student and as teacher, besides being a safe-guard to health.

### D. Scholarship:

8. A student once admitted must establish himself as satisfactory. He must show that he has the capacity to do academic and professional work of college grade, and that he is in accord with the ideals of teacher training.

In other words, he must be a high grade student and person.

---

## SPECIAL DEPARTMENTS

The special department of Music requires three years', and Home Economics requires four years' attendance. State certificates, without further examination, will be granted. Special Kindergarten course has been combined with Group I of the Regular Normal as Kindergarten-Primary (two years), with life diploma. Requirements for admission to music or Home Economics courses are the same as for the Regular Normal (See page 21).

## STUDENTS MUST SELECT ONE OF FOUR CURRICULA

The four curricula that are offered to students have been organized upon the principle that teaching in the elementary schools can be classified into sufficiently definite types to require specialization. Each curriculum prepares for a specific type of teaching position.

The two years' work of the Normal School is divided into four semesters. The work of the first semester is the same for all students. A large purpose for the work of the first semester is to acquaint students with the requirements for successful teaching in the different grades so that they may be able to decide intelligently in what grade or grades they prefer to teach. The course entitled "Introduction to Teaching", which includes observation and participation in the training school, is especially designed to aid students in a wise selection of a curriculum.

At the end of the first semester students are asked to select one of the four curricula for the purpose of specialization in a specific field of teaching. The work of each curriculum must be completed in its entirety. Students may be granted the privilege of changing from one curriculum to another only on condition that the prescribed courses of any curriculum must be completed before a certificate of graduation is granted.

---

### THE FOUR CURRICULA

- Group I—Kindergarten-Primary—for teachers of Kindergarten and Grades 1, 2, and 3.
- Group II—Intermediate Grades—for teachers of Grades 4, 5, and 6.
- Group III—Grammar Grades and Junior High School—For teachers of Grades 7, 8, and 9, and even Senior High School if sufficient electives are taken.
- Group IV—Rural—for teachers of rural schools.

These curricula are now being revised, but should any of these courses be materially changed, students will be notified by a letter from the Principal's office.

(Beginning Algebra and Plane Geometry supposed to have been done in the high school.)

**Science:**

General Chemistry .....	4	6
Qualitative Analysis .....	6	3
Household Chemistry .....	6	3
General Physics .....	4	6
Biology .....	4	3
Physiography .....	3	3
General Science .....	4	3
Teaching of Science .....	3	3
Teaching of Geography in the Junior High School....	3	3

**Social Studies:**

American History to 1840 .....	3	3
American History since 1840 .....	3	3
American Government .....	3	3
Modern European History .....	3	3
General Sociology .....	3	3
Economics .....	3	3
Teaching of History .....	3	3

**Foreign Language:**

Cicero .....	3	6
Vergil .....	3	6
French I .....	3	6
French II .....	3	6
Spanish I .....	3	6
Spanish II .....	3	6

(The first two years of Latin supposed to have been done in the high school.)

**"Free" Electives:**

Any subjects not listed above but agreed upon by faculty and student. They permit additional work in chosen fields to qualify for teaching in Senior High Schools.

## ENTRANCE AND ADVANCED CREDIT FOR TEACHERS IN SERVICE

ADOPTED BY THE STATE DEPARTMENT OF PUBLIC  
INSTRUCTION.

The following conditions apply to those persons who have taught in Pennsylvania public schools prior to July 1, 1922:

1. "The fifteen units of high school work required for entrance to the state normal schools may be earned:—

In approved high schools

In summer schools

In extension classes

By correspondence study

By tutoring under approved conditions.

CREDITS FOR ENTRANCE MAY ALSO BE SECURED BY TEACHING EXPERIENCE IN PENNSYLVANIA PUBLIC SCHOOLS AT THE RATE OF THREE STANDARD HIGH SCHOOL UNITS FOR EACH YEAR OF SUCCESSFUL TEACHING."

2. "Whenever a teacher has earned the credits necessary for entrance to a state normal school in any of the above ways or by a combination of them, four semester hours of credit in a regular state normal school curriculum may be granted for each year of teaching experience in Pennsylvania with a rating of "middle or better", subsequent to meeting the entrance conditions, up to a maximum of thirty-two semester hours, provided, however, that all credit thus given shall be conditional until the teacher shall have proved his ability to do the work of the state normal school curriculum in a creditable manner."

3. "In all cases in which normal school credit is given for teaching experience the work remaining to be done shall be selected by the authorities of the normal school to secure the best development of the student in teaching power."

4. "A minimum of one semester resident study shall be required of all candidates for graduation who are credited for teaching experience as outlined above."

5. "Entrance and normal school credits based on teaching experience as outlined above will not be granted after September 1, 1927."

BRIEF DESCRIPTION  
OF THE  
COURSE OF STUDY

---

THE STATE COURSE OF STUDY

The state course of study is used as the basis for the courses in the teaching of the elementary school subjects.

CLASSIFICATION AND NUMBERING OF COURSES

All courses are classified in seven departments. All courses numbered below 10 are common to all groups. A decimal indicates that two or more courses of the same department occur in the same semester. A single digit or the last two digits indicates the semester in which the course occurs. The first two digits indicates the group in which the course occurs.

EDUCATION

Education 1—Introduction to Teaching

All groups, 1st semester. 4 periods, 3 hrs. credit.

The primary purpose of this course is to aid students in selecting a specific curriculum at the end of the first semester, and to imbue them with a strong professional spirit and high standards of professional ethics. It includes consideration of the different types of teaching service, the general aims of the public schools and, more specifically, the work to be accomplished by the primary, intermediate, junior high and rural schools respectively, a brief sketch of the characteristics of children in these different types of schools and the qualifications required of teachers to meet the needs of children at the different age levels in these different types of schools. The broad social aims of each type of school and its relation to the state are emphasized.

The instruction in this course is closely correlated with frequent visits of observation and participation in the training school.

Education 2—Psychology and Child Study

All groups, 2nd semester. 3 periods, 3 hrs. credit.

This is an elementary course in psychology combining the important topics of both general and educational psychology, and forming the basis of the specific courses in educational theory and practice. The chief topics considered are: (a) instinctive tendencies; (b) habit-

formation; (c) memory, association (including localization of functions), and economy of learning; (d) the effective life; (e) the thought processes; (f) the extent and causes of individual differences among children, and the use of intelligence tests in determining them; (g) the treatment of exceptional children. About one-third of the course is given to the study of the characteristics of children at the different levels of growth. One laboratory period each week is given to the observation of children. While this course is practically identical in all curricula, there is a differentiation in the observation of children and in the laboratory experiments, each group emphasizing the characteristics of children at the age level of its particular curriculum.

#### **Education 13—Kindergarten Theory**

Group I, 2nd semester. 2 periods, 2 hrs. credit.

This course deals primarily with kindergarten aims, purposes, technique, and equipment. Special attention is given to modern tendencies in kindergarten practice, and particularly to the relation of the kindergarten to the primary grades. Observation and participation in the training school is a prominent feature of the course.

#### **Education 13—School Efficiency**

Group I, 3rd semester. 3 periods, 3 hrs. credit.

This course correlates closely with the student teaching, deriving a large part of its meaning from the teaching experience of the student. The instruction is shaped by the aim and purposes of the kindergarten and grades one, two and three, and includes such topics as: class-room routine, the organization of the daily study and recitation program; hygiene standards for and care of class-rooms; the making and keeping of records; and is followed by the analysis and study of class-room technique as: the significance of the play spirit in the primary grades; the management of primary grades; the use of seat work; the value of dramatic expression; types of class-room exercises applicable in the primary grades; and the project and problem method as applicable to children of this age; and the practical application of educational tests and scales.

#### **Education 23—School Efficiency**

Group II, 3rd semester. 3 periods, 3 hrs. credit.

This course correlates closely with the student teaching, deriving a large part of its meaning from the teaching experience of the student. The instruction is colored and shaped by the purposes and nature of the work in the intermediate grades and includes class-room routine, and daily study and recitation program, hygienic standards for and care of class-rooms, the making and keeping of records, and is followed by the analysis and study of such class-room technique as: methods of lesson assignment; types of class-room exercises; efficient

methods of study; types of questioning; the value and uses of intelligence and educational tests; and the project and problem method as applicable to the fourth, fifth and sixth grades. The problem of discipline in these grades receives attention.

**Education 33—School Efficiency**

Group III, 3rd semester. 3 periods, 3 hrs. credit.

This course deals with the principles of instruction common to the teaching of all subjects in the seventh, eighth and ninth grades and is closely correlated with student teaching. Consideration will be given to such topics as types of lessons, the recitation, the assignment, the question, the project and problem method, the socialized recitation, lesson plans, supervised and independent study, the use of educational tests and scales, problems in discipline, economy in class-room management. A considerable part of the time of this course is devoted to a discussion of educational guidance problems. The course analyzes the processes and problems of the important types of human occupations, the aptitudes and training required for each, the financial rewards, the hazards, the opportunities and avenues for advancement in each field. As far as possible typical occupations are studied at first hand, including occupations of agriculture, manufacture, transportation, exchange, public service, professional service, domestic and personal service, and clerical occupations. The pertinent printed matter in books, pamphlets and magazines is examined and organized.

**Education 43—Primary Methods**

Group IV., 3rd semester. 3 periods, 3 hrs. credit.

This is a composite course including the best modern primary methods in number, geography, history, and handwork. It is devoted to a consideration of environmental material in geography and the development of correct geographical concepts; to the aims and purposes of history in the primary grades and the materials available for these grades, with emphasis on the selection of materials for patriotic and other special days; to the best methods of inculcating in children simple health habits; and to the best available means of seat work through paper cutting, weaving, clay modeling, etc.

**Education 4—History and Principles of Education**

All groups, 4th semester. 4 periods, 4 hrs. credit.

This is an integrating course and aims to bring together and interpret the details of educational theory and practice represented by the preliminary courses, and to leave with the student a unified body of educational doctrine. The course begins with a brief review of the origin and development of present day practices and tendencies in public school education, the large emphasis being placed on those movements that have originated, or at least have come into promi-

nence, since the time of Rousseau. The discussion of such topics as: the aims and purposes of education; the development of various conceptions of educational values; and the history of present status of such educational movements as: vocational education; the treatment of backward children; scientific measurements; the junior high school; the doctrine of interest; formal discipline; the transfer of learning; project and problem teaching; and the socialized recitation.

**Education 44—Rural School Problems**

Group IV., 4th semester. 3 periods, 3 hrs. credit.

The aim of this course is similar to that of the course in School Efficiency in Groups I, II, and III, and includes in addition the defects of the one-room rural school treated constructively, not destructively; the advantages of consolidation; the organization of rural school; the daily study and recitation program reducing the number of classes by combining grades, alternating grades, correlation, etc.; vitalizing the course of study; club work; community center work; heating and ventilation; play and recreation; and beautifying the school grounds. The discipline of the rural school is discussed.

**Education 3—Student Teaching**

All groups, 3rd semester. 10 periods, 10 hrs. credit.

**THE TRAINING SCHOOL.** The training school is the pivotal point of all the work of the normal school. It functions as a laboratory for every department of the school and articulates with particular intimacy with the Department of Education.

**OBSERVATION AND PARTICIPATION.** Although student teaching is confined to the senior year, junior students are given frequent opportunities for participation in the work of the training school, and observation of expert teaching in the training school is a feature of all the courses in education and of many other courses throughout the curricula. One critic teacher is assigned to each two class rooms and demonstration lessons are taught from time to time in exemplification of the various phases of good educational practice.

**DISTRIBUTION OF TIME.** A minimum of two consecutive sixty-minute periods per day for one semester is given to student teaching. Where two student teachers are assigned to the same class in the training school the assignments are so adjusted that each student teacher has a definite problem. The distribution of teaching time is designed to give progressively to the student an increasing class responsibility.

**LESSON PLANS.** Plan forms are used upon which all lessons taught by student teachers are planned. Critic teachers hold daily conferences with the student teachers under their charge and approve all lesson plans of student teachers before the lessons are taught.

**STUDENT TEACHERS.** Every student teacher confines his

teaching to the grades of the group which he has elected. Student teachers electing group I and group II have practice experience in all the subjects of the curriculum and, if possible, in all the grades of the group. Student teachers electing group III confine their practice teaching largely to the subjects in which the student has elected to specialize and if possible, have practice teaching in all the grades of the group. Student teachers electing group IV confine their practice teaching largely to the rural one-room ungraded school and have opportunity for contact with the community problems. All assignments for student teachers contemplate the completion of a unit problem.

**TRAINING CLASSES.** Training classes aim to have not less than twenty nor more than thirty pupils, that is, enough pupils to set up a normal social situation and yet not so many as to unduly tax the limited skill of the teacher.

**THE PUPILS.** The pupils in the training school by reason of the careful planning of each lesson and the close supervision of expert teachers, as well as through the use of abundant and elaborate equipment of the normal school, are most favorably situated to secure the best possible education.

---

## ENGLISH AND FOREIGN LANGUAGE

### ENGLISH

#### English 1—English Fundamentals

All groups, 1st semester. 3 periods, 3 hrs. credit.

The purpose of this course is to acquaint the student with the source of material in English and the forms of correct expression.

A definite standard of written and spoken English must be acquired and maintained by all students. Further work in English without extra credit will be required of all who fail to reach and maintain this standard.

A few periods of instruction are given in the method of classifying and cataloguing books and in the use of reference books, readers' guides, etc.

About a third of the time of the course is devoted to a thorough review of the basic principles of English grammar and special attention is paid to the structure of sentences and the syntax of their various parts. The course includes a brief history of the language and the principles underlying its development.

About a sixth of the time of the course is devoted to a study of words including pronunciation, diacritical marking based on a generally recognized system of phonetics and attention is paid to basic principles in etymology.

**English 1.1, 2.1—English Composition**

All groups, 1st and 2nd semesters, 2 periods, 2 hrs. credit  
each semester.

This course includes a thorough study of the forms of English prose composition together with much practice in writing. The four types of English prose, narration, description, exposition and argumentation are carefully studied and analyzed with reference to form, content and technique. Special attention is given to the essay and the short story as media of prose expression and students are required to write frequent themes illustrative of the various prose forms discussed. These are made the subject of class criticism and discussion. The teacher in charge of the class meets the students from time to time for personal consultation.

**English 2—Oral Expression**

All groups, 2nd semester, 2 periods, 2 hrs. credit.

This course is designed primarily to insure (1) a good teaching voice and (2) effective address with facility and ease in oral expression.

**English 13—The Teaching of Primary Reading**

Group I, 3rd semester, 3 periods, 3 hrs. credit.

The primary aim of this course is to enable the student to acquire skill in the teaching of reading to beginners including the development of skill in the use of phonics. The course includes a comparison of the principal methods of teaching reading and the historical developments of various methods of teaching reading are traced. Consideration is given to the psychological processes involved in reading. The student acquires familiarity with the means of measuring efficiency in reading. This course is accompanied with observations of primary reading classes as well as the actual teaching of reading.

**English 22—The Teaching of Oral and Written Composition**

Group II, 3rd semester, 2 periods, 2 hrs. credit.

The aim of this course is to ascertain how to secure free self expression from the pupils in oral and written composition. Special stress is placed upon oral composition as speech functions more largely than written compositions in life. The prospective teacher is made to realize the necessity of assisting the pupils to form clear percepts and images as a basis for clear expression. The acquisition of a vocabulary by the pupil and his manner of applying it in the expression of his thought is carefully studied. Easy and natural transition from oral to written composition is the end sought in the teaching of composition. The use of standard measurements and tests in oral and written composition is taught in connection with this course.

**English 43—The Teaching of Oral and Silent Reading**

Group IV, 3rd semester. 3 periods, 3 hrs. credit.

The aim of this course is to enable the student to acquire skill in the teaching of reading to beginners and the handling of the technique of silent reading with older pupils. Attention is given to the development of skill in the use of phonics. Consideration is given to the psychological processes involved in reading. The student acquires familiarity with the means of measuring efficiency in oral and silent reading. The course includes a comparison of the principal methods of teaching reading and is accompanied with observation of oral and silent reading classes as well as the actual teaching of such classes.

**English 14—Children's Literature and Story Telling**

Group I, 4th semester. 3 periods, 2 hrs. credit.

This course involves the collections and study of literature in verse and prose suited to children of this age. The selections are studied for the purpose of finding the elements contained therein that are likely to appeal strongly to children. The study of folk tales and fairy stories is included in this course.

The course in story telling covers the principles involved in telling stories to children. It involves also the application of the principles of child psychology and voice training to the telling of stories.

**English 24—Juvenile Literature and Silent Reading**

Group II, 4th semester. 3 periods, 2 hrs. credit.

This course is planned to give a foundation for teaching literature and silent reading to pupils of the intermediate grades.

It aims to give an adequate knowledge of those literary types that are most suitable for children of this age.

Magazines and current literature are studied and selection made from these sources as well as from standard authors.

A study is made of the difficulties that children meet in their effort to comprehend thought from the printed page. Students are made familiar with the scientific measurements of silent reading.

**English 34—Juvenile Literature and Silent Reading**

Group III, 4th semester. 3 periods, 2 hrs. credit.

This course aims to make an intensive study of the literature suitable for pupils of the grammar grades and junior high school.

Emphasis is placed upon the ethical situations developed in the reading of pupils of this age. The course also aims to give students control over the technique of teaching silent reading. Students become familiar with the standard measurements of silent reading.

## MATHEMATICS

### Mathematics 12—The Teaching of Number

Group I, 2nd semester. 2 periods, 2 hrs. credit.

This course covers intensively the work in arithmetic of the first three grades. Parallel with this, is a careful consideration of the approved methods of developing number concepts, of providing measurements and other forms of application, of correlating the number work with the work of other subjects, conducting drill on number "facts", etc. The methods are illustrated by the observation of actual work with children, by demonstration lessons and by the study and use of simple apparatus and materials, visual aids, etc. A sketch of the historical development of methods of teaching primary arithmetic is a feature of the course.

### Mathematics 22—The Teaching of Arithmetic

Group II, 2nd semester. 3 periods, 3 hrs. credit.

This course aims to develop a systematic presentation of the facts and principles of arithmetic with special emphasis upon the topics that are most significant in the work of the intermediate grades. The treatment illustrates at every step the most effective methods of teaching arithmetic. Attention is given to the results of the recent experiments in the psychological processes involved in the teaching of arithmetic and to the measurement of efficiency in this subject by the standard test and scales. Observation of the teaching of arithmetic in the intermediate grades is an essential part of the course.

### Mathematics 32—The Teaching of Mathematics

Group III, 2nd semester. 3 periods, 3 hrs. credit.

This course includes important topics in the teaching of arithmetic in the seventh and eighth grades and in the junior high school. Emphasis is placed upon the commercial and industrial applications of arithmetic, with much practice in the making and solution of problems. Attention is given to the teaching of a course in composite mathematics in the junior high school. The use of standard measurements is given consideration. Observation of the teaching of mathematics in these grades is a requirement of the course.

### Mathematics 42—The Teaching of Arithmetic

Group IV, 2nd semester. 3 periods, 3 hrs. credit.

This course aims to present a systematic study of the topics in arithmetic that are found in the course of study of the rural school. A special effort is made to have students understand how to use the resources of the country in supplying opportunities for the application of arithmetic. Attention is given to the psychology of arithmetic and to the standard measurements in this subject. Observation is an essential part of the course.

## SCIENCE

### Science 1—Nature Study

All groups, 1st semester. 3 periods, 2 hrs. credit.

The word nature study is used in a broad sense to cover all phases of elementary science adapted to all groups. This course aims to give the student a definite body of knowledge of common forms of environmental materials and to supply the principles that will guide him in selecting and using environmental materials wherever he may be located. The course includes as wide a range of observation as possible of materials which the prospective teacher may be called upon to use in his work. Field trips are supplemented by laboratory study. For teachers of the upper grades a differentiation is made in favor of materials that supply the basis for further scientific study especially in the field of biology.

### Science 12—The Teaching of Geography

Group I, 2nd semester. 1 period, 1 hr. credit.

The emphasis in this course is upon the use of environmental materials for the purpose of developing in the minds of the children correct geographical concepts as to direction, location, and geographical forms. Students have practice in choosing materials for study, as well as demonstration of the materials and methods employed by others. An attempt is made to furnish instruction that will enable the student later to adapt his knowledge to the environment in which he is teaching. A part of the time is devoted to laboratory and field work.

### Science 22, 32, 42—The Teaching of Geography

Groups II, III, IV, 2nd semester. 3 periods, 3 hrs. credit.

This is a general course in geography given from the standpoint of man's reaction to his environment and aims to co-ordinate fundamental principles of geography. The course is developed from the viewpoint of casual relations rather than the mere enumeration of facts and principles. As far as time permits some study is made of regional geography as a type of further application. Students get training in the organization and the presentation of geographic data through the use of the project problem method; in the preparation and the use of maps, graphs, diagrams, and other illustrative material; and the problems and methods involved in teaching field geography. Students are made familiar with the use of standard educational measurements in geography. The observation of classes in the teaching of geography is a necessary part of the course. Such differentiation in the application of the above principles and methods is made for the different groups as the course of study in geography requires.

**Science 44—Agriculture**

Group IV, 4th semester. 3 periods, 3 hrs. credit.

A large purpose of this course is to give to the teachers of rural schools an insight into and sympathy with the basic industry of the rural population and to appreciate the larger aspects of this industry as related to our national welfare. The rural teacher is instructed how to relate a knowledge of agriculture to the experiences of rural children with a view of motivating the teaching of the common branches. Opportunity is offered for participation in agricultural projects so that teachers can initiate and supervise projects with their pupils. Through this course teachers come in touch with the leaders of agricultural improvements and learn of the available sources of information on agricultural subjects.

**SOCIAL STUDIES**

**Social Studies 12—The Teaching of History**

Group I, 2nd semester. 1 period, 1 hr. credit.

This course begins with the consideration of the aims and purposes of history in the primary grades. The course is devoted mainly to a study and practice in oral presentation and dramatization; and a consideration of the organization of material for special days, festivals, and patriotic exercises. Particular advantage is taken of the results of the work of Dewey in expressing historical movements through industrial arts. This course gives attention to work in civics with a view of having students teach children the fundamental civic virtues and afford a basis of social experience for the interpretation of new social situations as they arise. Emphasis is given to the teaching of significant civic virtues through stories, poems, songs, dramatization and various pupil activities.

**Social Studies 22—The Teaching of History**

Group II, 2nd semester. 3 periods, 3 hrs. credit.

The course includes a study of such history as will equip students to teach the history of the intermediate grades as recommended by the state course of study. Observation of teaching in these grades is a feature of the course.

Attention is given to teaching civics in the intermediate grades. The course for the fourth and fifth grades centers around the idea of community cooperation, emphasizing those who furnish us food, clothing, shelter, medical aid, light, transportation, protection, etc. The work of the sixth grade centers around the idea of industrial co-operation with emphasis upon vocational opportunities, study of community service through occupations, and the qualifications required for each occupation.

**Social Studies 32—The Teaching of History**

Group III, 2nd semester. 3 periods, 3 hrs. credit.

A course primarily for those specializing in social studies. An intensive course in the teaching of American history with emphasis on the European background. The difference between secondary and primary source material is shown and the student gets acquainted with available source materials, as well as acquires a knowledge of the principal text and reference books. The value and danger of historical parallels is shown as well as the importance of relating the study of history to current events. Students are taught to test historical data and to interpret historical facts.

The teaching of community civics follows bulletin No. 23, 1915, of the United States Bureau of Education. The larger responsibilities of citizenship and of patriotism as revealed by the World War are presented and the student gets acquainted with the many books in these fields available for children as well as the proper reference material for the teacher.

**Social Studies 43—The Teaching of History**

Group IV, 2nd semester. 3 periods, 3 hrs. credit.

This is a composite course in the teaching of history and civics using as a basis the report of the Committee of Eight of the American Historical Association and bulletin No. 23, 1915, of the United States Bureau of Education entitled "The Teaching of Community Civics." Special emphasis is laid upon the opportunities for citizenship in rural communities and upon the ultimate dependence which all civilization has upon the products of the soil. The course aims to develop resourcefulness in the student in the use of available text and reference books.

**Social Studies 44—Rural Sociology**

Group IV, 4th semester. 2 periods, 2 hrs. credit.

The primary aim of this course is the inculcation in the minds of the students of a love for and just appreciation of the importance of a healthy country life, and includes consideration of such topics as: defects of present day country life, treated constructively; the lack of rural pride and rural co-operation; land tenantry; migration from the country to the city and its causes; co-operative buying and selling; the need for scientific agriculture; the country home; the country church; good roads; and the country school as an agent in intellectualizing, socializing and spiritualizing country life.

## ARTS

### Arts 1—Art

All groups, 1st semester. 4 periods, 2 hrs. credit.

The aim of this course is to enable students to teach the public school course of study in drawing, including the representation of common objects, the elementary principles of design, lettering, composition and color harmony in their application to dress, home, school, and community interests; to give students facility and confidence in their ability to draw and illustrate on the blackboard a wide range of school subjects; to develop appreciation of art and ability to teach pupils the appreciation of art including the study of pictures. Such differentiation is made in this course for the different groups as the course of study requires, including the teaching of the elements of mechanical drawing for the upper grades.

### Arts 1.1—Handwriting

All groups, 1st semester. 2 periods, 1 hr. credit.

At the beginning of this course the handwriting of students is measured by one of the handwriting scales and if they fall below the standard set for teachers they are put in special classes for practice. The time of this course is devoted largely to methods of teaching writing and to developing skill in blackboard writing. Students are instructed in the results of the recent investigations in the psychology of writing. Through measuring their own handwriting and the handwriting of children, students become acquainted with the use of handwriting scales.

### Arts 12—Industrial Arts

Group I, 2nd semester. 4 periods, 2 hrs. credit.

This course aims to instruct students in the use of various materials that will enable them to work out simple problems as they arise of the daily necessities of food, clothing and shelter. Students learn to appreciate the problems that are within the interests of children and how such problems may be graded according to the child's control of technique. The course includes clay modeling, paper and card-board construction and simple problems in wood and textiles. Students observe demonstrations of this work in the training school and participate in such work.

### Arts 23—Sewing

Group II, 3rd semester. 2 periods, 1 hr. credit.

The aim of this course is to enable students to teach simple stitches to pupils of the fourth, fifth and sixth grades and to handle projects in the making of various articles for personal and household use.

**Arts 14—Industrial Arts**

Group I, 4th semester. 4 periods, 2 hrs. credit.

This course gives continued attention to the use of handwork as an illustrative factor in the teaching of nature study, geography, history, literature, arithmetic, and industrial activities of life. Emphasis is given to technique and the organization of such forms of handwork as may be used successfully in the regular class room. The course includes work in paper and cardboard, bookmaking, basketry, textiles, pottery and wood. Students observe demonstration of this work in the training school and participate in such work.

**Arts 4—Music**

All groups, 4th semester. 4 periods, 2 hrs. credit.

This course presupposes a knowledge of the elements of music. The purpose of this course is to fit students to teach music in the public schools. The salient features of this course are: a treatment of the child's voice, a study of the tonal and rhythmic problems of each grade, ear training, melody writing, sight reading, and part singing, a study of the song material adapted to each grade, the use of the phonograph to develop musical appreciation, and the development of musical programs. Students are taught how to apply the standard musical tests to discover musical talent. Observation and practice teaching are a requirement of the course.

**HEALTH EDUCATION**

**Health 1.1—Personal and School Hygiene**

All groups, 1st semester. 2 periods, 2 hrs. credit.

**Personal Hygiene**—The aim of this course is to secure in the students settled habits in the care of the body which will lead to stronger, healthier and more efficient lives. The course aims to have students understand the hygiene of posture, nutrition, clothing, exercise, fatigue, rest and sleep; the causes of ill health and disease together with their control and prevention. Only those facts of physiology and anatomy which have special significance for hygiene are considered. The instructor will hold personal conferences with students as a part of the course.

**School Hygiene**—(The aim of this course is to equip the student with the knowledge of school and child hygiene necessary for a teacher.) The following topics are included: normal growth and its standards; the ill effects of malnutrition, bad air, lack of exercise, excessive exercise, lack of proper rest, defective vision, defective hearing, adenoids, diseased tonsils; remedies for various defects and the best methods of treating them from the school standpoint; hygiene

of program making; school sanitation, including school furniture, ventilation, heating, lighting, water supply, toilets, etc.; regulations of state and local boards of health; the problem of nutrition as applied to school children with laboratory exercises in food values and food preparation. Observation of good hygienic school conditions and of good hygiene teaching is an important feature of this course.

**Health 12—Health Habits**

Group I, 2nd semester. 1 period, 1 hr. credit.

This course deals with the best methods of inculcating in the child proper habits of health, and includes methods of teaching cleanliness, value of bathing, care of the teeth, proper diet, tooth brush drills, proper clothing, protection of the eyes, importance of fresh air and sunlight, protection against contagious diseases, causes of fatigue, and the value of rest and recreation.

**Health 1, 2—Health Education**

All groups, 1st and 2nd semester. 3 periods, 1½ hrs.  
credit each semester.

Two hours each semester—Physical Education—floor work; apparatus; marching; rhythmic work, including clubs, wands and folk dancing; games, athletics including track and field events, tennis, hockey, hiking, skating, etc. Corrective work including proper exercise for students unable to take regular gymnasium work.

One hour each semester—a graded course in health education including physical exercises and games arranged to meet the needs of children at various stages of development through the grades. Discussion of the different theories of play, and the management and equipment of playgrounds. First aid in emergencies is included.

**Health 3, 4—Health Education**

All groups, 3rd and 4th semesters. 3 periods, 1½ hrs.  
credit each semester.

Two hours each semester—Physical Education—floor work; apparatus; marching; rhythmic work, including clubs, wands, and folk dancing; games; athletics including track and field events, tennis, hockey, hiking, skating, etc. Corrective work including proper exercises for students unable to take regular gymnasium work.

One hour each semester—the graded course in health education for children continued. Demonstration lessons and student teaching. Athletic activities for use on playground. Physical examination of school children.

Social Hygiene—a part of the time of this course is devoted to a discussion of problems of heredity, environment, sex hygiene and eugenics.

HOME ECONOMICS

The requirements for admission are graduation from a four year high school, or the equivalent.

The expenses are the same as in the regular normal course, which are listed elsewhere in the catalog.

Graduates in this course are eligible to all types of Home Economics positions.

**SUMMER PROJECTS**

At least one summer project is required. Two projects will be required of any student whose need demands them.

A project carried at the end of the sophomore year is planned so that the student may have an opportunity to continue the work in her weakest subject. This project is planned with the subject matter teacher and checked by her.

A project coming at the end of the junior year may tie up with the work in methods or in the practice house. If it is selected in methods this project may be planned with the methods' teacher and checked by her. If it is selected in the practice house field it is planned with that instructor and checked by her.

**DOMESTIC SCIENCE COTTAGE**

A beautiful cottage on the campus is devoted exclusively to the work of the department. The young ladies live here with their instructors and learn practical home-making. This is a feature that adds greatly to the practical, as well as the theoretical, part of the course, and stimulates interest either for public school or social usage.

**DESCRIPTION OF THE COURSES**

**FIRST YEAR**

**FIRST SEMESTER**

**Clothing I (Garment Making and Textiles)**

9 periods—5 hrs. credit

This course includes elementary sewing, simple garment making including simple wash dresses, decorative finishes. Textiles are studied in connection with garment projects. Sewing processes, the uses and care of the sewing machine with its attachments, the use of commercial patterns and simple drafting are applied in the making of household articles, undergarments, blouses, skirts and dresses of wash materials.

**Principles of Design—I (& 2)**

1st sem. 4 periods—3 hrs. credit.

2nd sem. 3 periods—2 hrs. credit.

Study of principles which underlie all design. The aim is to develop an understanding of and taste for good design and color.

**Physiology and Hygiene (Bio. I.)**

2 periods—2 hrs. credit.

Biological principles as studied in the activities and functions of the human body. The digestive process in the inter-relationships of the various systems of organs of the nervous system, circulation, respiration, with cell action in metabolism.

**SECOND SEMESTER**

**Bacteriology (Bio. 2)**

5 periods—3 hrs. credit.

The course is designed to give a general knowledge of bacteria, yeasts and molds in their relation to the affairs of daily life. Special attention is paid to the place of micro-organisms in nature and their relation to problems of food preparation and preservation and to health. The course includes microscopic study of the organisms, including both the pathogenic and non-pathogenic.

**General Chemistry**

4 periods—3 hrs. credit.

Laws and theory of general chemistry; non-metallic elements and their compounds; metals; qualitative analysis.

**Foods**

7 periods—4 hrs. credit.

A fundamental course in the application of scientific principles to preparation. Lectures, recitations and laboratory work on composition, sources, methods of manufacture, selection, preparation and comparative nutritive and economic value of commonly used foods; planning and serving of simple meals on a family basis.

**Practical Housekeeping**

4 periods—2 hrs. credit.

The course covers a study of the various types of service to be rendered in a household and the organization of the activities involved in the work of the house. The course includes practical work in the care of the house and laundering. It offers an opportunity for the students to come in contact with the practice house work of the seniors.

Courses as described in the Catalog under Regular Normal Course.

**First Semester**

English (I). 3 periods—3 hrs. credit.

\*Elective. 3 periods—3 hrs. credit.

Phys. Ed. & Health (I). 3 periods—1 hr. credit.

**Second Semester**

English (II). 3 periods—3 hrs. credit.

Phys. Ed. & Health (II). 3 periods—1 hr. credit.

**SECOND YEAR**

**FIRST SEMESTER**

**Organic Chemistry**

4 periods—3 hrs. credit.

A study of the compounds of carbon, the compounds of the aliphatic and aromatic series.

**Applied Design (Household)**

3 periods—2 hrs. credit.

This course deals with the application of the principles of design and color in furnishing the home. It includes a study of historic and modern types of furniture and furnishing. Opportunity for studying the application of these principles is given in the furnishing of the cottage. A short unit in basketry is included.

\* Electives in general education subjects.

**Foods (2)**

5 periods—3 hrs. credit.

This course gives the student practice in the more complicated processes of cookery, with wider use of food materials, flavoring and garnishes; experience in marketing, special emphasis on the planning and serving of menus suitable for breakfast, luncheons, dinners and special occasions.

**Clothing 2 (& 3 Dressmaking)**

1st sem. 6 periods—3 hrs. credit.

2nd sem. 6 periods—3 hrs. credit.

This course includes the use of silk and wool materials and the construction and finishes of tailored garments. Consideration is also given to the clothing budget, children's garments and to the selection, care, renovation and remodeling of clothing, and the making of dress forms.

**SECOND SEMESTER**

**Household Chemistry**

5 periods—3 hrs. credit.

A study of the composition of common food materials and methods of analysis applicable to foods; of fuels; of simple textile chemistry; of the chemistry of household cleansing materials and processes.

**Applied Design (Costume)**

3 periods—2 hrs. credit.

This course includes a study of historic types of costumes, present day fashions and the needs of the individual. It deals with principles of design and color in their application to costumes. Practice is given in drawing to record ideas and these principles carried out in costuming in clothing classes.

**Home Nursing**

2 periods—2 hrs. credit.

The aim of this course is to teach how to protect one's self and family from preventable diseases, to give intelligent care in minor illnesses and emergencies, and how to insure proper care in serious illnesses. Some practical work is given.

**Clothing 3**

See 1st sem., Clothing 2(&3).

## THE MANSFIELD NORMAL QUARTERLY

---

Courses as described in the Catalog under Regular Normal Course.

### 1st Semester

English (3). 3 periods—3 hrs. credit.

Introduction to Teaching. 3 periods—3 hrs. credit

Physical Education & Health (3). 3 periods—1 hr. credit.

### Second Semester

English (4). 3 periods—3 hrs. credit.

Psychology & Child Study. 3 periods—3 hrs. credit.

Physical Education & Health (4). 3 periods—1 hr. credit.

## THIRD YEAR

### FIRST SEMESTER

#### Household Physics

5 periods—3 hrs. credit.

Principles of Physics as applied to household problems involved in plumbing, heating, lighting, ventilation, and the selection of efficient household devices. Various kinds of household equipment are studied in applying these principles.

#### Nutrition and Dietetics

6 periods—4 hrs. credit.

Course includes a study of the processes by which food becomes available to the body; the nutritive caloric value of foods; fundamental principles of human nutrition; essentials of an adequate diet; differences in food requirement of individuals; various physiological, economical and social factors governing the planning of dietaries; a study of infant and child feeding; special adaptation of diet in disease.

#### Costuming (Millinery)

4 periods—2 hrs. credit.

Selecting, designing and constructing of hats according to seasonal demands and individual wardrobe and economic needs. Instruction in making wire frames, pattern making, covering of frames, various forms of hat decorations, remodeling and renovation. Student provides materials subject to approval of the instructor.

**SECOND SEMESTER**

**Child Care and Training**

3 periods—3 hrs. credit.

A study of the child in his development as considered from the physical, psychological, social and recreational standpoints. The course will include practical laboratory experience in observing and caring for children.

**The School Lunch**

6 periods—3 hrs. credit.

The organization, preparation and serving of a noon lunch to meet the needs of the individual school. This course will include providing school lunch to the Junior High School and lower grades to meet the local needs.

Courses as described in the Catalog under Regular Normal Course.

**First Semester**

English (5). 3 periods—3 hrs. credit.

Educational Psychology, or

History and Principles of Education. 3 periods—3 hrs. credit.

**Second Semester**

Economics. 3 periods—3 hrs. credit.

Problems in American Democracy. 3 periods—3 hrs. credit.

\*Elective. 3 periods—3 hrs. credit.

**FOURTH YEAR**

**FIRST SEMESTER**

**Household Management—Practice House**

3 periods—3 hrs. credit.

The theoretical course deals with methods involved in applying scientific and economic principles to the care of the house, its operation and business of the household. Attention is given to budgets, household planning and organization, division of time and labor and other features of home management.

**Household Management—Practice House (Continued)**

6 periods—3 hrs. credit.

Application of these principles are made in the Practice House where small groups of students live for at least six weeks planning as well as doing all the work.

- \* Electives in general education subjects.

**The Teaching of Home Economics**

3 periods—3 hrs. credit.

This course includes methods of teaching and observation of vocational home economics classes as well as of general home economics classes. Planning lessons and courses of study, presentation of lessons in foods, clothing and other home making activities are included.

**Practice Teaching and Directed Observation**

2 periods—2 hrs. credit.

Case methods of studying recitations will be observed,—selecting lessons to illustrate certain principles of teaching and using these lessons as a basis for class discussion.

**SECOND SEMESTER**

**The Family in its Social Aspect**

2 periods—2 hrs. credit.

The development of the family as an educational and social institution; the household as an economic unit; standards of living; the social and community responsibilities of the homemaker; the vocational life of girls and women outside the home in its relation to home life; the home economics movement, its development and influence upon the home and family life of today.

**Clothing (4)**

6 periods—3 hrs. credit.

Advanced clothing selection and construction; textile study including textile legislation and special economic problems.

**Practice Teaching**

4 periods—4 hrs. credit.

Supervised practice teaching in vocational and general home economics departments.

Courses as described in the Catalog under Regular Normal Course.

**First Semester**

\*Electives. 4 periods—4 hrs. credit.

**Second Semester**

Sociology. 3 periods—3 hrs. credit.

\*Electives. 3 periods—3 hrs. credit.

\* Electives in general education subjects.

**MUSIC DEPARTMENTS**  
**CONSERVATORY OF MUSIC**

**INTRODUCTORY.**

The instruction in this department is given by teachers who are artists of very superior ability and attainment. The work is founded upon the plan of the best conservatories of music and makes possible to the student at a most moderate fee opportunities which are offered only by schools of the highest order. It is the aim of the department to fit its graduates for efficient teaching or for public appearance.

**PIANO.**

The course in Piano covers four years. It requires one lesson a week and three practice periods a day through the first and second years, and two lessons a week and three practice periods a day through the third and fourth years. Either Voice or Orchestral Instrument should be studied, one lesson a week through the last two years of this course. One year of piano should precede, or be taken in connection with, all the other courses. The course includes studies by Czerny, Loeschorn, Kuhlau, Bach's Two and Three Inventions, and Well Tempered Clavichord; sonatas of Mozart, Haydn and Beethoven and the works of Mendelssohn, Schumann, Chopin, Greig, List, Rubenstein, Dvorak, etc.

**VOICE.**

Three years are required to complete the course in Voice. Special attention is given to tone production, voice placing and breathing, enunciation, phrasing, blending of registers, and the technical exercise of Bonoldi, Lutgen, Panofski, Lamperti, etc. English, Italian and German songs are taught and a suitable repertoire is selected and given to each student.

**VIOLIN.**

The course in Violin covers four years' work. It comprises studies by Hohmann, Dancla, Schubert, Henning, Kayser, DeBeriot, Kreutzer, Dont, Ries, Alard, Baillet, Sevcik, Kross, Schradieck, Leonard, Compagnoli, Fiorillo, Rode, etc.; sonatas by Mozart, Bach, Handel, Greig and Beethoven and solos by the masters.

**VIOLINCELLO.**

An adequate course is offered for those who desire to study the Violincello. Work is also offered in Mandolin, Guitar, and Banjo.

### ORGAN.

This course is open to any who have completed two years of piano. Its object is to prepare students for church positions, as well as to fit them for recital work and to become teachers of Organ. The works of the best composers for the organ are studied, considerable time being devoted to the study of Bach during the second year of the course. The school has an excellent three manual organ, built by the Austin Organ Company, of Hartford.

### SYMPHONY ORCHESTRA.

A Symphony Orchestra averaging forty members, composed of students of the school, is maintained, and holds two rehearsals each week, giving opportunity to become familiar with the best forms of orchestral literature. The orchestra gives frequent concerts.

### SCHOOL BAND.

A well-equipped band is one of the attractions in the Music Course.

---

## MUSIC SUPERVISORS' COURSE

### Entrance Requirements

The possession of an acceptable singing voice and of a fairly quick sense of tone and rhythm.

Ability to sing at sight hymn and folk tunes with a fair degree of accuracy and facility.

Ability to play the piano or some orchestral instrument representing two years study.

A general academic education, representing a four year high school course or its equivalent, including the ability to speak, write and spell the English language acceptably.

### Expenses

The expenses are fully listed elsewhere in this catalog.

## SUMMER SCHOOL

(In Session at Mansfield and Muncy Branch)

(For more detailed information request a copy of the Summer Session Bulletin.)

**DATE.**—The summer school opens Monday, June 14, and closes Saturday, August 14. Students should plan to reach Mansfield not later than the evening train on Monday, June 14. Do not come before June 14. The summer session lasts nine weeks.

**EXPENSES AND FEES.**—Tuition free if you are a four year high school graduate, or the equivalent; board, \$7.00 a week, \$63; registration fee, \$10. Books must be purchased. They will probably cost from \$5.00 to \$10.00. Laundry fee, \$1.00 (girls only). The full expense of the Summer Session must be paid on day of registration. The board rate may be changed, in which case all students will be notified.

**CREDIT SECURED AT SUMMER SESSION.**—By action of the Normal School Principals no student will be allowed to secure more than twelve (12) semester hours credit in the summer session. As the summer session is nine weeks in length, or half a semester, students will not be enrolled for more than twenty-four hours of class-room work per week or its equivalent.

**WHAT THE STUDENT NEEDS TO PROVIDE.**—All rooms are completely furnished. Floors of hardwood. Students must provide napkins, towels, pillow-slips, sheets for single beds, and sufficient blankets or comfortables. The school does not provide any bed covers. Mansfield is in the hills and the nights are cool. Two blankets are not too many. Every student must have a laundry bag, with name clearly written in indelible ink on it. Clothes need not be marked, as that will be done in the laundry. **IMPORTANT.**—On the day you enter, bring in your hand bag or suit case two sheets and a blanket. You need these the first night, as your trunk may be delayed. Or, if you prefer, send two sheets for a single bed and a pair of blankets by insured parcel post, addressed to yourself, in care of the Normal School, Mansfield, Pa., and we will place this package in the room assigned to you. Do this a week before the opening of the summer session.

**MUSIC SUPERVISORS' COURSE**—Subjects in this course will be offered. See Summer Session Bulletin.

## THE MANSFIELD NORMAL QUARTERLY

**STUDENTS INTERESTED**—Four classes of students will be cared for at the summer session.

(1). Students who wish to earn at least eight semester hours of work during the summer in order to teach in the fall on a Partial Elementary Certificate. Students in this class who wish to continue teaching during the next three years on credit secured at summer sessions must finish the following twenty-one semester hours of work in three years, not more than 12 semester hours of which can be made in a summer session.

The courses in Art, Music and Health must be taken at least one each year, or until all three are completed. The school efficiency course must be included in the first summer's work. Arrangements of the other courses may be made by the candidate and the principal of the Normal School. The entire twenty-one credits may be completed in two summers, if desired, but must be completed within three.

Subject	Semester Hours
Art .....	3
Music .....	3
Health .....	3
School Efficiency .....	3
Introduction to Teaching .....	3
Child Psychology .....	3

and one of the following: Teaching of,—Reading, Social Studies, Geography, English or Mathematics, each 3 semester hours.

(2). Normal graduates who wish additional professional courses or who wish further specialization in some special field of study. Such students will be able to secure from the regular Normal courses listed below twenty-four hours of work adapted to their needs.

(3). Teachers who have started but who have not completed the work for the permanent certificate. For such students regular professional courses will be offered to satisfy the new rules adopted by the Council of Education. Four semester hours of general professional work will be required for each subject still to be completed on the general professional list.

The requirements for the permanent certificate will also include courses in Health, Music and Art, carrying three semester hours credit and reciting six hours a week during summer school.

(4). Normal School students and teachers in service who wish to secure credits toward Normal School graduation or its equivalent. To meet the needs of such students the following courses will probably be given:

## THE MANSFIELD NORMAL QUARTERLY

(Courses starred are required of students in Group II.)

### A. Courses required in one or more groups,

#### Junior Year, First Semester

*Introduction to Teaching	*Music
English Fundamentals	*Art
English Composition	*Health Education

#### Junior Year, Second Semester

*Psychology and Child Study	Music
English Composition	Health Education
Oral Expression	

#### Senior Year, Third Semester

\*School Efficiency

#### Senior Year, Fourth Semester

History and Principles of Education	Educational Sociology
Children's Literature and Story Telling	Educational Measurements

### B. Courses required in single groups in the Regular Normal.

Kindergarten Theory	Gr. I
*Teaching of Primary Reading	Gr. I
Teaching of Primary Subjects	Gr. I
*Teaching of Arithmetic	Gr. II
*Teaching of Geography	Gr. II
*Teaching of History	Gr. II
*Teaching of English	Gr. II
Rural Sociology and School Problems	Gr. IV

### C. Elective Courses, as follows, and others if desired by a group:

Language Latin  
French

Mathematics Mathematics in Junior High School  
Algebra

Social Studies American Social Problems

English Literary Masterpieces, English and Continental

Science General Science in the Junior High School  
Human Geography  
Chemistry II.  
Physics I.

## OF SPECIAL INTEREST

Education means more than that which is received from textbooks or imparted in the class room. There are certain cultural elements which will be found in every wisely educated person—elements that cannot easily be described, but the absence of which in anyone makes him a marked person.

**ETIQUETTE**—Great care is taken in this school to supply these features of true education. Specific addresses are given from time to time, by the Deans of the faculty, upon the various phases of "good form." These teachings are insisted upon in the lives of members of the school.

**SOCIAL LIFE**—As this is a co-educational institution, frequent occasions are made for the natural and proper association of the sexes—always under the chaperonage of members of the faculty.

The Normal emphasizes simplicity in dress. Elaborate day and evening clothes should not be provided. Students are urged to dress as becomes teachers—prospective leaders of boys and girls.

Several organizations add to these cultural elements in the student's life. These are re-enforced by many literary, musical and scientific gatherings to which pupils are urged to give their time and effort.

**LITERARY SOCIETIES**—Two flourishing literary societies are maintained by the students. Every one is encouraged to become a member, and to take an active part in the meetings.

**LIBRARY**—As an adjunct to all this, and also an essential aid to class work, the school is supplied with a superior circulating and reference library, selected by the librarian and the teachers of the several departments. More than a thousand volumes are added yearly, and it is catalogued after the most modern and approved plan. It is housed in a commodious and well-lighted room, and in the library is to be found a list of the leading magazines and the daily and weekly papers. The library is also open of evenings.

**LIBRARY STUDY**—All students are required to take a course in library work, thus fitting them the better to use and enjoy libraries and to direct the reading of their pupils. An especial phase of the work is the study of Juvenile Literature.

**ENTERTAINMENT COURSE**—We maintain a superior course of lectures and entertainments each year. These lectures are open to all students of the school, the enrollment fee paying for the course ticket.

**ENVIRONMENT**—But choice cultural elements cannot be wrought into one's habit of life unless his environment lends constant support to that end. Our pupils are brought to a dining-room unexcelled by any school, whether we consider the quality of what

## THE MANSFIELD NORMAL QUARTERLY

---

is furnished or the attractiveness of the room in which it is enjoyed; the rooms of our students are the most commodious and the best furnished to be found in any school of our class; while the corridors and public rooms are adorned with statuary and pictures which reflect the choicest that art has yet produced.

**RELIGIOUS AIDS**—The religious element in our natures receives here the attention which its importance merits. Without a touch of sectarianism, but with constant regard for those of all faiths, the very life of the school is made to reveal the spirit of true religion. Bible study, stated meetings for devotion, missionary study, and religious addresses—all under the auspices of the Y. M. C. A. and Y. W. C. A.,—although purely voluntary, are always encouraged, and are largely attended. Sunday morning church attendance is advised, as is also the six o'clock vesper service.

**ATHLETICS**—Athletics comes in also for its due share of attention. A committee of Trustees and Teachers controls this phase of the school's activities.

The games of Football, Basketball, Baseball, and Tennis are open to all members of the school.

**HEALTH EDUCATION**—Aside from the above named sports of the school, especial attention is given to Health Education. This is for the health, strength and grace of the individual, as well as for its value to him as a teacher. In this work pupils are required to wear clothing suitable for such exercises—divided skirt and loose blouse for the ladies; a negligee shirt for men, and rubber-soled shoes for all. Students are advised not to get suits until they reach Mansfield, so that all may follow an approved pattern. They can be purchased here at very slight cost. All regular students of the school, regardless of the course they are pursuing, are required to take work in the gymnasium, unless they are physically incapacitated, in which case they are excused upon presentation of a physician's certificate.

A graduate dietitian, of wide experience, has entire charge of the kitchen and dining room, planning all meals and supervising the cooking of the same. She is also the instructor in nutrition. It is just as important to be well fed as to be well dressed and well educated.

A State Hospital is located at Blossburg, nine miles from Mansfield, on the macadam road, and on the Erie Railroad, where serious operations or diseases receive immediate attention at low cost, by special arrangement between the Normal and the Hospital.

## THE MANSFIELD NORMAL QUARTERLY

---

**RESIDENT PHYSICIAN**—A resident physician is now on the staff. He gives instruction in Health Education and has charge of the health of the students and faculty who board in the dormitories.

**HOSPITAL**—The school provides a hospital, with a resident nurse. No charge is made for the services rendered by the nurse, but in case of contagious or prolonged disease, parents must provide a special nurse. Every precaution is taken to insure the health of the pupils.

**STUDENTS' ROOMS**—The educational influence of our students' rooms is not overlooked. They are commodious and are tastefully decorated and furnished. Two students are expected to occupy a room.

Ladies' rooms are furnished with carpet, rockers, straight chairs, tables, bed-room set complete, pillows, and mirror on dressing case.

Gentlemen's rooms are furnished with arm chairs, straight chairs, tables, wash-stand, dressing case with mirror, bed, and pillows.

All rooms are heated by steam and lighted by electricity.

Students furnish napkins, towels, pillow-slips, sheets and comfortables or blankets.

**BAGGAGE**—The school will pay for the transfer of the student's baggage when the student enters during the first two days of the school year. The school, however, will not pay for the transfer of baggage at other times.

**HONORS**—Nominations for public honors made by any organization of the school, must be submitted to the faculty for approval before the person can be elected.

Each class is divided into three groups, viz: Honor, Credit, Graduation.

The Honor group comprises those whose average, for the year the honor is given, is 90 per cent. or over; the Credit group, those whose average is from 85 per cent. to 90 per cent. Average for graduation is 75 per cent.

Announcement of the standing of the first two groups in each class will be at Commencement.

**FREE SERVICE TO SCHOOL BOARD AND TEACHERS**—School Boards and Superintendents desiring the services of good teachers are requested to make early application to the Principal of the Normal School. Students will be recommended entirely upon the

record which they have maintained while at this school, or through personal knowledge. Graduates of Mansfield Normal School are asked to keep in touch with the Principal of the Normal School in order that they might be recommended for better positions demanding experience. A Teachers' Bureau, no commission charged, is maintained for the benefit of our graduates.

**STUDENT LOAN FUND**--A fund of about \$20,000 has been established largely by Alumni to aid worthy students. Although this sum seems large, nevertheless it is really very small when attempt is made to distribute it to the worthy cases that are presented. For that reason it is necessary to establish provisions that will most nearly fit the conditions of the school and of the student who desires to complete his course here. Reasonable amounts may be borrowed to be paid back after the student graduates. The provisions are:

1. Not available during summer sessions.
2. Available only during last two years of attendance at Mansfield. If student is in a two year course, he is eligible; if in a three year course, not eligible until his middle year; if in a four year course, not eligible until his Junior (next to last) year.
3. Not more than \$100 a year to a student.
4. Note for the amount to be signed by the applicant, and a responsible person with property.
5. No interest charged until one full year following graduation. Interest at the rate of 5 per cent charged at the beginning of second year following graduation, and 6 per cent thereafter. The entire amount must be paid within two years following graduation, and should be paid during the first year in installments from \$10 to \$20 a month.
6. The amount borrowed in any one year cannot be applied all at once on entering, but in equal quarterly installments, as the bills from the school fall due. A student borrowing \$100 may use \$25 on entering; \$25 at the middle of the semester; \$25 at the beginning of the second semester; and \$25 at the middle of the second semester. He cannot have more than \$25 in advance of his needs. If he asks for \$100, and does not need the full amount, he does not have to borrow more than he needs.
7. Application to the Principal for the amount desired should be made before September 1. He will inform you if money is available, and will issue you a statement which you will present to the Bursar on entering.

**STUDENT GOVERNMENT**—In the Fall of 1917, the young ladies of the Normal, feeling the responsibilities of school life, and regarding themselves as prospective leaders of boys and girls, requested permission to relieve the hall teachers of their duties, and to assume some of the responsibilities for order in the girls' dormitory. This was granted, with the result that Study Hour has never been so satisfactory as at present. The simple regulations, self-imposed, make an appeal to those who want to do right of their own accord. This same plan has since been adopted by the young men.

**THE TRAINING SCHOOL**—The opportunities offered the student teachers in the Training School are unexcelled by any Normal. Although Mansfield is a small borough of 2,000 inhabitants, yet the surrounding community, as a whole, is fairly populous for school purposes and progress. Many rural schools dotted the hill sides, but a few years ago, all of these, for miles around, were consolidated with our Training School. These, combined with the borough pupils—all borough pupils up to and including grade IX are in our Training School—give us a public school system of 600 pupils, organized in grades and a Junior High School. The Training School faculty and all equipment and supplies are selected by the Normal School authorities. The Normal Seniors teach and observe under real school conditions—20 to 35 pupils to a room, with the best of training teachers to supervise and direct. All plans and problems are carefully considered before the student teachers take charge of the school rooms.

## BUILDINGS AND GROUNDS

The Normal School buildings present a noble and imposing aspect. The school grounds have an area of fifty acres. The lawns about the buildings are beautifully laid and covered with a great variety of forest trees. The sports of the school are carried on in Smythe Park, a beautiful enclosure in Mansfield of about thirty acres, containing a ball field that is unexcelled, and with seating capacity for five thousand persons.

### SOUTH HALL

This is a brick structure, one hundred fifty feet in length by fifty feet in width. In this building are the men's dormitories, the circulating library, reading room and reference library, recitation rooms, and the text-book library. The building, formerly the old seminary, was enlarged and remodeled in 1889. One hundred and fifty feet north of South Hall, stands the

### NORTH HALL

This is one of the finest school buildings in the country. It is two hundred and seventy feet long by one hundred feet wide, and five stories high. It contains the Principal's office, dormitories for the women, reception rooms, Y. W. C. A. room, suite of rooms for the Art and Music Departments, an elegant dining room large enough to seat five hundred, passenger and freight elevators, kitchen, bakery, cold storage plant. The dormitories on each floor of both buildings are supplied with bath tubs, showers, and everything needed for health and comfort. All the buildings are heated by steam, lighted by electricity, and supplied with fire escapes of the best construction. Midway between the North and South buildings is

### ALUMNI HALL

This is a brick building, fifty-four by one hundred seventeen feet, three stories high. It contains the recitation rooms, Junior High and a concert hall which occupies one entire story. In this hall is located one of the finest pipe organs to be found in this section of country, installed at a cost of \$15,000. This building was completed in 1886. In the rear of South Hall stands the

### GYMNASIUM

This is a fine structure; it is a frame building seventy-five by one hundred thirty feet; it contains a large hall, fifty by one hundred feet, two spacious rooms used for dressing rooms, a room equipped with shower-baths and lockers, and one class room. The drill hall is well furnished with apparatus. This building was erected in 1888.

### TRAINING SCHOOL

To the east of North Hall there stands a superior structure devoted to the Training School. The building is one hundred and twenty feet in length by seventy-two feet in width; two stories and a basement. It contains twelve regular class rooms, a commodious assembly hall, office and other rooms for the special help of retarded children. In the basement are separate play rooms for boys and girls, heating and ventilating appliances, etc. It is a fire-proof building erected of re-inforced concrete, with a brick facing. Connected with the Training School are play grounds and school gardens.

### HOSPITAL

A hospital (brick building) completely isolated from the dormitories, is in full operation. It is furnished with every appliance for the sick, and it also contains the permanent apartments of the regular nurse. There is also a cottage on the campus, fully equipped, for contagious diseases.

### PRINCIPAL'S RESIDENCE

A beautiful residence has been erected on the south campus, built of red brick of the colonial type of architecture. It is in complete harmony with the main buildings, and adds dignity to its surroundings.

### Y. M. C. A.

A bungalow, ninety by thirty-five feet, has been built in the rear of the gymnasium, on the extreme south campus, known as "The Y," to be devoted exclusively to the religious and recreational activities of the boys. This is their own building, and contains reading room, rest room, and a large auditorium. The interior is as cozy as it is beautiful. A large fire-place is in one end of the building. Pennants, athletic trophies and pictures of school organizations create an atmosphere of activity and loyalty. A large porch, ten feet wide, runs almost the entire length of the building. The structure cost \$10,000. This building is under the supervision of a director. It is felt that the use of this, as planned, will be a powerful uplift among all the boys, as it is in no way sectarian. So far as we know, this is the only building of its kind at any of the schools, and is strictly in line with the purposes of this school to remain at the front in developing young men.

**DOMESTIC SCIENCE COTTAGE**

(See item under Domestic Science Course.)

**SPECIAL LAUNDRY ROOMS**

There is a special room where the girls may do any extra washing or ironing that they desire.

A special room has been prepared in the Gymnasium where boys may press their clothes. This, too, is equipped with electric irons.

**SMALL BUILDINGS**

Numerous smaller buildings, as barns, ice house, cold storage, pumping stations, etc., on the farm, add to the utility and convenience of the plant.

**TENNIS COURTS**

Seven large, well-kept tennis courts are maintained. These afford one of the most beneficial exercises for the boys and girls.

**HEATING PLANT**

The new central heating plant, located across the street from the Training School, has been completed. It is a brick structure, costing with equipment, about \$45,000.

**GIRLS' CLUB HOUSE**

The girls have a completely equipped club house for parties and entertainments.

## **EXPENSES IN REGULAR NORMAL COURSES AND IN HOME ECONOMICS**

The regular school year is 36 weeks in length. A special summer session of nine weeks is operated.

The total expenses in the Regular Normal courses and in Home Economics are:

*Board, including 12 pieces of laundry a week..	\$252
Enrollment fees .....	20
Laundry room fees for the regular year (girls)	2
Books bought (estimated).....	18

†Total .....

---

\$292.

A semester is 18 weeks. When a student enters he pays one-half of the board for the semester; \$10 enrollment fee; \$1.00 laundry fee; and buys his books that are needed at that time. No books will be rented, but will be sold to the students a little above cost. Two weeks before the opening of school in September, every student who is enrolled will be sent a bulletin of necessary information, which tells him exactly what payments to make, and when, and gives the details of all matters that need to be attended to.

\*Note 1. Board rate has been \$7 a week, but there is a possibility of an increase for the coming year. This will be done only if ordered by the Board of Normal School Principals and the State Department of Education, and will apply alike to all Normal Schools. Due notice will be sent to all prospective students in case of a change.

†Note 2. Laboratory fees are charged only to those students taking courses requiring laboratory work, and are based upon cost of material used.

## **EXPENSES IN THE MUSIC SUPERVISORS' COURSE**

Each student in this course will pay a semester fee of \$70.00 which will entitle the student to three private lessons, thirty minutes each, per week. These will be given in voice, piano, violin, or other stringed instrument. Four practice periods each day are also included in this fee.

No student will be excused from voice lessons, but, upon examination satisfactory to the Director of Music, he may be excused from piano or stringed work, in which event he may be asked to take work on some other instrument.

In consideration of the reduced fee, no further reduction what-

**THE MANSFIELD NORMAL QUARTERLY**

---

ever will be made for lessons missed. In case of personal illness, the instructor will endeavor to make up the lessons, if convenient.

The full charges in the Music Supervisors' Course for the year are:

\*Board, fees, books (same as Regular Normal) \$292  
 Required private lessons (two semesters).... 140

Total ..... \$432

No music school can offer you more advantages at so low cost.

\* See Note 1. under Regular Normal Expenses.

**EXPENSES FOR PRIVATE LESSONS IN  
 MUSIC**

These Music expenses are only for students who are not taking the Music Supervisors' Course, as such students are granted a special rate listed above.

Violin or other instruments, per lesson (one half hour) .. \$1.25

Piano, per lesson (one half hour) ..... 1.25

Voice, per lesson (one half hour)..... 1.25

Pipe Organ, per lesson (one half hour)..... 2.00

Rent of Piano:

One period per day, per week ..... .25

More than one period per day, per week..... .20

Rent of Pipe Organ:

One period per day, per week..... 2.00

When a student is in private lessons less than a semester (18 weeks), the charge is \$.25 more for each lesson taken.

Regular Normal students taking class or group work in special Music Supervisors' Course will be charged as follows:

One hour course, per week ..... \$ .50

Two hour course, per week ..... .75

Three hour course, per week ..... 1.00

When the school time of the music teacher is assigned to individual tutoring, the rate is \$2.50 an hour, just as in private music lessons, and same must be arranged with the Director of Music and the office of the Bursar.

**DEDUCTIONS**

Students are charged more per day when in attendance only a part of the Semester, as the regular overhead charges continue. The regular board has been \$7 a week, but \$1.25 a day if a student enters late or leaves before the close of the Semester. This rate is subject to change as explained in Note 1 under expenses of Regular Normal course.

The enrollment fee is not deducted even though a student leaves during the term.

Students leaving before the end of the Semester must obtain written permission from the Principal, and full settlement of expenses incurred be made at the office. Otherwise, charges will be made for the entire Semester.

#### PAYMENTS

**TO WHOM MADE**—All checks should be drawn to the order of the State Normal School, and payment made to the Bursar.

**BOARDING STUDENTS**—All dormitory students on entering **MUST** make the following payments, check or money order preferred, made out to Mansfield State Normal: Board for 9 weeks ( $\frac{1}{2}$  of a semester; books must be purchased. The cost will be around \$18. Enrollment fee for a semester (one half year), \$10; deposit on key to room, \$1. Students must show card of admission to teachers to enter classes, and this card cannot be obtained until the amount mentioned above is paid. The remainder of the first semester's account is due about the middle of November. A student may pay for the entire semester ( $\frac{1}{2}$  year) when he enters. The small charges made in the laboratory will be paid at the end of the term, as we are unable to tell how much material each student will use. The boarding rate includes 12 pieces of laundry a week.

Students will be compelled to leave school who get in arrears for their board bill, unless satisfactory arrangements have been made with the Principal.

Students from out of town must board in the Normal School dormitories unless they have previously received special permission from the Principal.

**DAY STUDENTS**—Day students pay enrollment fee and buy books.

A charge of \$1.00 a semester will be made for the use of a locker in the day student's room. This must be paid in advance. Day students are not compelled to have locker, but will find that one of the steel lockers furnished by the school affords safety and convenience.

**BOOKS**—Must be purchased.

**GRADUATION AND CREDITS**—Members of the Senior Class will not be graduated unless they have paid all their bills, neither will members of the lower classes receive a standing for the year unless all accounts have been settled. It is essential to educational and moral development that students shall recognize the necessity for prompt discharge of indebtedness.

## FOR PROSPECTIVE STUDENTS

(Kindly answer the following questions, and mail this form to the Principal. It will aid in finding a roommate for you, and in attending to other important matters.)

Name (in full) .....

Home Address .....

Are you, or will you be, a four year high school graduate? .....

When? .....

What high school? .....

Your age.....; height.....; weight.....; race.....

The church you prefer to attend.....

When do you expect to enter?.....

Do you want a room reserved in the dormitories?.....

The date you made this applicaiton for a room.....

What course do you expect to take? Regular Normal.

Home Economics, Music Supervisors,

Have you sent to the Normal School Principal for a high school credit form entitled "APPLICATION FOR ADMISSION," required by the Department of Public Instruction of all persons who now

enter Normal Schools?..... This is for your complete high school credits.

If not, shall we send you this form?..... Students should return this form to the Principal before Aug. 16, but if your high school principal is away, and you are unable to get your high school credits, be sure to bring it with you when you enter, or have it sent within a day or so after you enter.

Write on the other side of this sheet the names of friends interested in attending Normal School, with their address. Indicate whether they are interested in regular or summer session.

**ABSENCES**

1. For each unexcused absence from recitation or other class exercise the student will be marked zero in the work missed.

2. Excused absences must be made up to the satisfaction of the instructor.

3. Any student for any reason absent from more than ten per cent of the scheduled exercises in any course during a semester will be refused credit for the course.

4. For all make up work involving special examination and a change in semester grades as recorded in the Dean's office, a fee of one dollar (\$1.00) for each hour of credit must be paid to the Bursar before the credit can be granted.

5. No excuses will be granted for absences before and after a week-end trip or a school vacation.

6. Students must make immediate application for excuses and present them if possible at the next meeting of the class after the absence occurs.

7. All excuses for absence from class are granted by the Dean of Instruction at his office on the form provided for that purpose.

8. For all make up work involving private lessons by the instructor, the student will pay the Bursar one dollar (\$1.00) for each half hour private lesson.

9. The co-operation of parents is requested in securing regular attendance on the part of pupils.

## EDUCATION

(By Daniel Webster)

Of a HOT day in July—it must have been in one of the last years of Washington's administration—I was making hay, with my father just where I now see a remaining elm tree. About the middle of the afternoon, the Honorable Abiel Foster, member of Congress, who lived in Canterbury, six miles off, called at the house, and came into the field to see my father. He was a worthy man, college-learned, and had been a minister, but was not a person of any considerable natural power. My father was his friend and supporter. He talked a while in the field, and went on his way.

When he was gone, my father called me to him, and we sat down beneath the elm, on a hay-cock.

He said, "My son, that is a worthy man. He is a member of Congress. He goes to Philadelphia, and gets six dollars a day, while I toil here. It is because he had an education, which I never had. If I had had his early education, I should have been in Philadelphia in his place. I came near it as it was. But I missed it, and now I must work here."

"My dear father," said I, "you shall not work. Brother and I will work for you, and wear our hands out, and you shall rest."

And I remember to have cried; and I cry now at the recollection. "My child," said he, "It is of no importance to me; I now live but for my children. I could not give your elder brother the advantages of knowledge, but I can do something for you. Exert yourself; improve your opportunities; learn, learn; and, when I am gone, you will not need to go through the hardships which I have undergone, and which have made me an old man before my time."

## ADVANTAGES OF THE SMALL COLLEGE

---

It should never be forgotten that the small college rather than the great university is the backbone of higher education in the United States. The work done in the two types of institution overlaps broadly, but neither entirely covers the field of the other. In graduate, professional and highly specialized studies the little fresh-water college cannot compete with the great university; but in laying the foundations of a liberal education, in forming character by benign human contacts, in fitting the student for life itself rather than for the job that is but part of life, the small college still stands without a rival.

The very limitations of the small institution preserves it from the danger of becoming unwieldy, top-heavy or over-extended. What it lacks in plant it makes up for in personnel. Its very smallness encourages individuality rather than standardization. The human contacts are closer. Men play a larger and freer part. They are not overwhelmed by rules, buildings, overwide choice of courses, complex social life and over-elaborate administration. There is as much to be said for the simple life in education as in the world at large. In all essentials a college is merely a group of teachers and learners. A dozen young men gathered in a quiet, shady place might be the kernel of an institution of the soundest learning, if only a Plato sat in their midst.

Associated with the great universities are great and learned men by the score; but as students multiply, their work must become more and more executive in its nature. They must distribute their courses among more subordinates and suffer their own personalities to be diluted by those of their assistants. Whether they will or no, they must face the problems of mass production.

—Editorial: Saturday Evening Post, July 19, 1924.
